PROFILE

UI/UX Designer with about a year of hands-on experience designing websites and AI product interfaces. At AlgoRoot I revamped AlgoJob's AI career platform and the AlgoVox interface, taking work from wireframes and prototypes to high-fidelity Figma files with developer handoff. My case studies combine user research, accessible design systems and motion, from a medicine-care app for older parents to an AI scam checker for families.

WORK EXPERIENCE

AlgoRoot Private Limited · UI/UX Designer — Aug 2025 – Aug 2026
Bhubaneswar, Odisha

- Revamped the UI/UX of AlgoJob's AI career platform, simplifying navigation and information architecture.
- Redesigned the AlgoVox product interface and the AlgoRoot website end to end, with clearer visual hierarchy and consistency.
- Produced wireframes, prototypes and high-fidelity Figma files with developer handoff documentation.
- Applied WCAG accessibility standards while working with dev and marketing teams in an agile setup.
- Wrote a UX/UI competitive research report on SkillWiz, an EdTech platform.

PROJECTS

FIKR · Healthcare App · UI/UX Case Study

- Designed a concept app where a parent confirms medicines with one "Taken" tap, so a child living far away is reassured without the parent feeling watched.
- Ran five user interviews and affinity mapping, then built personas, user flows, wireframes, a Material 3 design system with night mode and a bilingual UI.

Shady? · AI Scam Checker · UI/UX Case Study

- Designed an AI scam checker for families that gives a calm verdict, underlines the red flags in the message and offers one next step, or asks a trusted person when unsure.
- Compared five existing checkers, built three personas and a token-based light and dark design system, with accessibility built in: large text and touch targets, and verdicts never shown by colour alone.

ShopUp · E-commerce UX Case Study

- Ran user research and usability testing with 6 participants, plus persona, empathy map and competitive analysis.
- Redesigned product discovery and checkout and added real-time delivery tracking, from information architecture to high-fidelity UI.

Bewakoof · Heuristic Evaluation

- Audited the app against Nielsen's 10 heuristics, severity-rated the gaps and wrote prioritised recommendations.

Talksy · Mobile App UI

- Designed a messaging app in Figma covering onboarding, chat and settings, backed by a reusable design system.

SKILLS

UI/UX: Wireframing, Mockups, Prototyping, User Flows, High-Fidelity UI, Design Systems, Component Libraries, Interaction Design, Responsive Design, Information Architecture, User Research, Usability Testing, Heuristic Evaluation, Accessibility (WCAG), Design Thinking, Developer Handoff

Motion: Motion Graphics, Logo Animation, UI Animation, Micro-interactions, Parallax and Carousel animation, 2D Animation, Frame-by-Frame Animation, Animation Principles

Graphic: Branding, Logo Design, Visual Identity, Typography, Colour Theory, Layout & Composition, Visual Hierarchy, Pattern Design, Social Media Design, Poster Design, Marketing Asset Design, Illustrations, Visual Storytelling

Collaboration: Brand Guidelines, Cross-functional Teams, Agile Workflow, Stakeholder Comms

TOOLS

Figma · Adobe Photoshop · Adobe Illustrator · Adobe After Effects · Canva

EDUCATION

Dice Academy · Graphics, UI/UX & Motion Design, New Delhi — Oct 2024 – Nov 2025

Veer Kunwar Singh University · Bachelor of Commerce (B.Com), Arrah, Bihar — 2018 – 2021
