VIVEK KUMAR

Brand · UI/UX · Motion · India

HELLO! I'M VIVEK

A brand, UI/UX and motion designer from India.

At AlgoRoot I rebuilt brand identities, redesigned the company website and designed product screens in Figma. On my own I make concept brands, apps and films, each one built on one clear idea and grown into a whole system.

EXPERIENCE

UI/UX Designer · AlgoRoot Private Limited

Aug 2025 - Aug 2026

Rebuilt brand identities and redesigned the company website. Designed product screens and handed them to developers in Figma. Made social, marketing and motion assets.

EDUCATION

Dice Academy, New Delhi

Graphic, UI/UX & motion design · Oct 2024 – Nov 2025

SELF-INITIATED

03 — THE CONCEPT

THREE READINGS, ONE MARK.

01
THE WEDGE

A solid wedge, arms cut at 23° — the angle every slash, badge and stripe reuses.

02
THE PLATES

Three bars each side lock around it and the silhouette reads as a loaded barbell.

03
THE BOLT

Struck out as negative space. The cut is what makes the wedge read as a V.

05 — THE SYSTEM

ONE ANGLE, ONE LIGHT, TWO TYPEFACES.

— THE KIT

CARRIED, WORN, HUNG UP.

SELF-INITIATED

THE IDEA

Every pattern is a real draft: what is printed could be woven.

a members' library of weave drafts.

CONCEPT BRAND · PACKAGING · CAMPAIGN · 2026

CONCEPT

The box names the sweet before anyone opens it.

CHASHNI

TYPE	Concept brand, packaging
ROLE	Naming, identity, packaging, motion
TOOLS	Illustrator, Photoshop, After Effects
YEAR	2026

— 05 THE BOX

A box that says what it is. Sleeve, drawer, pull tab.

240 × 110 × 50 mm, drawer and sleeve. The sleeve and the ribbon tab are always ghee; the pour on the lid and the drawer take the sweet's colour.

— 06 THE SWEET-CODE SYSTEM

One variable. Four values.

The sleeve and the pull tab are always ghee. Only the pour and the drawer change colour, so the lid names the sweet before it is opened.

MEDICINE CARE

FIKR

CONCEPT

CONCEPT UI/UX CASE STUDY · MOBILE APP · 2026

THE IDEA

Parents tap one button: Taken. Silence means all is well.

"Papa, medicines le liye?"
"Haan beta."

THE RESEARCH

five interviews: being asked can hurt more than the medicine.

AI SCAM CHECKER

CONCEPT AI PRODUCT · UI/UX CASE STUDY · 2026

CONCEPT

Not a score: an answer, with the evidence.

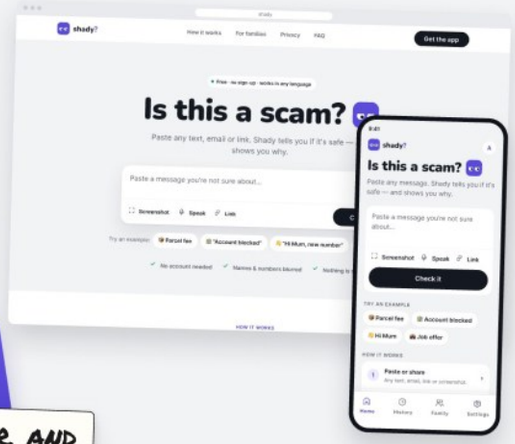

SHADY?

TYPE	Concept UI/UX case study
ROLE	Research, AI UX, UI, motion
TOOLS	Figma, Illustrator, After Effects
YEAR	2026

CONCEPT · WEB APP + PWA · 2026

shady?

An AI scam checker for families — a calm answer, and the why, in seconds.

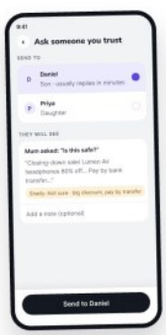

A CALM ANSWER, AND THE WHY, IN SECONDS

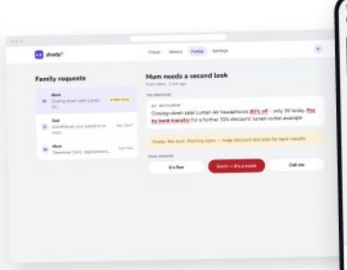

THE FAMILY LOOP

Not sure? Shady asks a human.

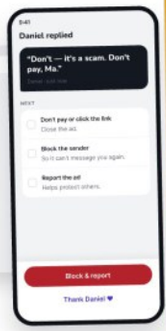

The feature no competitor has — and the answer to the research: people don't ask because asking feels like admitting a mistake.

1 · Mum asks, in one tap

2 · Daniel answers from his laptop

3 · The reply comes back

THE PROBLEM

Scams win on speed and silence.

57%
of adults worldwide met a scam last year — 23% lost money.

64%
of scams are over within a day of first contact.

22%
of targeted older people told no one — they felt too embarrassed.

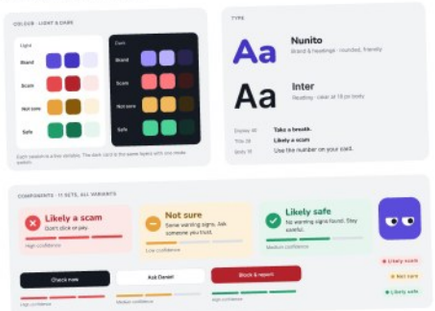

Existing checkers give a score. People need the why — in their language — and someone to ask.

DESIGN SYSTEM

One calm system, light and dark.

Every colour is a token bound to a variable, so dark mode is one switch. A verdict is never colour alone: always colour + icon + word.

YEAR	2026

QUAYL · MOTION IDENTITY

Everyone animates the brand.
Nobody animates the wait.

ONE MINT LINE CLOSES INTO THE Q

QUAYL · LOGO · 8 REFINED

One Q. The ring is the money arriving; the mint line is how it got here.

QUAYL

Primary wordmark · the Q's stroke matches the stem weight of Sora Bold, so Q and UAYL read as one family

App icon

96 · 48 · 32 · 20 px

On light

On ink

One colour, on mint

Rules

Clear space = the thickness of the mint line on every side. · Minimum size: wordmark 80 px wide, icon 20 px. · In colour the line is always mint; in one-colour versions it matches the ring. · The Q only moves the way the motion system says: the line travels in, the ring closes.

THE PROBLEM

A spinner tells you nothing.

You finished the work and sent the invoice. Now you wait, and every banking app shows the same thing: "pending".

Payment pending

Has the client paid?
When will it land?
Is something wrong?

THE GAP I FOUND

Everyone animates the brand. Nobody animates the wait.

Fintech motion identities are abstract and brand-led. Payment-status animations live in isolated UI kits. I found nothing that connects the ad, the logo and the status in the app.
